## Dynamic impact test

### Certificate pSi-19-1620-001

**Bott GmbH & Co. KG**  
**Bahnstrasse 17**  
**D-74405 Gaildorf**

This certificate confirms that the product

**bott vario3 car equipment incl. cargo load**

was tested in a rear-end collision of a VW Crafter against a Mercedes-Benz Vito with full overlap with a speed change and average acceleration following

**DIN EN 1789:2007+A2:2014**

The vehicle equipment bott vario3 incl. cargo load has withstood the loads following DIN EN 1789:2007+A2:2014. The connection points to the floor and to the sidewall held securely. No parts of the vehicle equipment or the cargo load were detached or thrown forward. Danger to driver and co-driver due to the installed vehicle equipment or the cargo load would not have been occurred. Detailed information on the test carried out and the results obtained can be found in the test report pSi-19-0104-TK009\_Test Results\_287.
